

## What is Science Technology and Innovation in Public Governance?

### Science Technology and Innovation in Public Governance (Sci-Tech @ FSPAC), is a 2 years English-language Master program.

Science, Technology and Innovation in Public Governance MA is the international academic program focused on the use of technology in governance. It answers an increasing need for a fluent public and private government system that brings comfort in the life of citizens. It encourages a decision-making process based on reliable data, the result of research. It also gives students the opportunity to develop themselves as entrepreneurs for both public and private government.

### What will I study?

The Science, Technology and Innovation in Public Governance MA curriculum is dynamic, permanently synchronized with the labor market demands and it aims to:

- **TECHNOLOGY** - Together with our partners from ITC industry we participate through the Applied Research Lab in the process of identification, research and development of ITC solutions for the act of governance in the public and private environments.
- **GOVERNANCE** - We encourage our students to develop their inner drive and we support them to become successful entrepreneurs of their own future and of the future of our desired society. Their governance and managerial skills are developed under the guidance of our top-management partners from government and industry, from Romania and from around the world.
- **INNOVATION** - Science, Technology and Innovation in Public Governance MA is disruptive and innovative in itself, by the straight connection it makes between technology, government and innovation. Our team is constantly up to date with the latest trends and discoveries in all fields, with a focus on the solutions for better governance processes.. In the Applied Research Lab, our students are challenged to participate in projects that are preparing our society for the future.

## What can I do with a Sci-Tech @ FSPAC?

### Should I apply?

Ideal candidates for the Sci-Tech @ FSPAC will have strong entrepreneurial interests and a passion to lead in the government and/or industry.

### What are my benefits?

- acquisition of practical skills valued in the labor market (e.g. process analysis, management, product management, big-data management, customer insight/analytics and user experience strategies, operations management and entrepreneurship).
- advanced technology courses to bring you to the forefront of government and business today
- personalized guidance from practitioners who make a difference in the field
- practical activities (1 to 1 with the mentors) in public and private top organizations
- possibility to be part of research & entrepreneurial extra-curricular activities
- for those registered and accepted, we offer a course with Certificate on European Project Writing and Evaluation/ Scrierea si evaluarea proiectelor europene.

**Admission criteria:** motivational interview, based on a letter of intent and a CV, both in English.
